February 27, 2004

To All South Florida District Employees:

I am pleased to present the South Florida District Office's Market Profile for FY 2004. The Profile provides the district staff with a wealth of information about the District's accomplishments, U. S. Census information, available resources, and partners serving the small business community.

The District Office is one of three pilot offices chosen to implement SBA's strategic direction to transform the Agency to "provide for citizencentered, market-based, customer-driven programs that are results oriented." The Market Profile is a valuable resource and will be very helpful in the implementation of our strategic plans.

A summary of the Market Profile is provided on the following pages within Tab A. The Market Profile will be made available electronically for your information and convenience. I invite you to review it and become familiar with its contents.

The Market Profile is a living document that will be updated and revised every year and as needed.

I take this opportunity to thank Gilbert Colón, Javier Barbeite and Ilene Rubio for their work in researching the items in the Profile and organizing this document.

Sincerely,

Francisco "Pancho" A. Marrero

District Director

FLORIDA STATE PROFILE

The Small Business Administration district offices, located in Miami and Jacksonville, serve entrepreneurs with financial, procurement, and technical assistance programs and services to create an environment where small businesses can prosper. South Florida District's Market Profile has been expanded to include the Florida State Profile to provide additional statistical overview of the people, economy, and competitively challenged areas for small business across the entire state. The Florida State Profile was created to serve as a resource to aid government officials and Congress with decision-making issues relating to small business in Florida.

DEMOGRAPHIC:

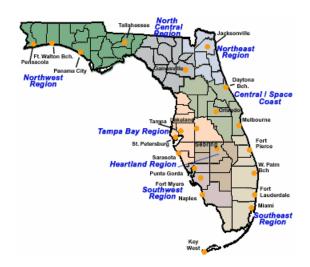

The demographics included in this profile is a compilation of the latest data from the U.S. Census Bureau and shows how the size of the population changed in the state of Florida. The data includes information on median income, housing units, and education levels obtained for the state.

ECONOMIC:

Economic data contained in the Florida state profile provides information regarding factors that affect business expansion. Key indicators such as labor, banking, and trade are listed in the profile. SPECIAL AREAS:

These identified geographic areas are included because part of SBA's strategic goals includes placing

Florida's Regions

emphasis on small business concerns located in urban or rural areas with high proportions of unemployed or low-income individuals and other groups with limited capital due to limited opportunities for small business ownership.

Strategic location, overall subtropical climate, and low cost of living attract many entrepreneurs to locate their business in Florida. The number of small businesses in Florida increased by 5.3 percent with health care, construction, and retail trade employing the greatest number of Florida workers. Passenger and cargo places the state in the top ranks for transportation in the world. Population growth has also made Florida the fourth largest state behind California, Texas, and New York with a total of almost 16 million persons. The following table provides insight into Florida's

QUICK FACT	S & FIGURES
POPULATION	15,982,378
▶INDUSTRIES	Education Health & Social Services, Retail Trade, Professional/Administrative Services

POPULATION

The demographics section included in this profile is a compilation from the 2000 Census and shows the population changes in the state of Florida. The data includes information on median income, housing units, and education levels obtained for the state.

Based on the 2000 Census, Florida ranked fourth in the nation for total population with 15,982,378 persons, an increase of 23.5 percent from 1990. About 89 percent of the inhabitants live in urban areas and the remainder lives in rural areas. People over the age of 65 made up 18 percent of the state's population in 1997, compared with the national average of 13 percent. Many older people from the rest of the nation and also some from Canada move to Florida after they have retired.

Whites represented 78 percent of the people, the largest share of the population. Blacks made up 14.6 percent of the population, Asians were 1.7 percent, Native Americans were 0.3 percent, Native Hawaiians and other Pacific Islanders were 0.1 percent, and those of mixed or other heritage or not reporting race were 5.4 percent. Hispanics, who may be of any race, were 16.8 percent of the population. Many of the Hispanics in Florida are Cubans or their descendants from the island nation. The median age is 38.7 years and the largest age group is between 35 to 44 years. The fastest growing age group was ages 50 – 54 increasing by 65.9 percent from 1990 to 2000.

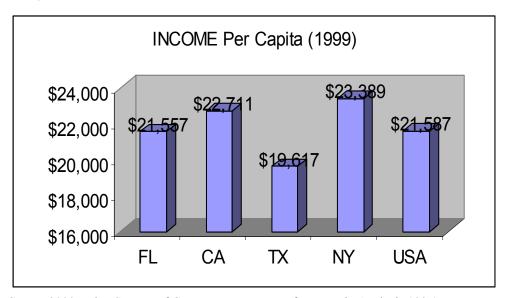

The population in the Miami metropolitan area (or Miami-Dade County) was 2.2 million in 2000. Miami is the principal commercial and manufacturing city in the state. Miami-Dade County has the largest concentration of Florida's Hispanic population, which make up over 65 percent of the population.

(Source: Census 2000. Note: The Census population represents permanent residents only. Tourists and seasonal residents are not included, but persons from foreign countries are included regardless of legal status and college students. The numbers and percentages may add to more than the total 100 percent because individuals may report more than one race.)

INCOME

Florida's median household income was \$38,819, below the national average of \$41,944. According to a report from the University of Florida, Bureau of Economic and Business Research, real personal income grew by only 2.6 percent in 2001. The income per capita was \$21,557 (Earned in 1999). In a 1997 study, there were three areas in Florida that ranked in the top 20 across the nation for per capita personal income. The West Palm Beach-Boca Raton metropolitan area, with a per capita personal income of \$38,772, ranks the highest in Florida and third in the nation, behind San Francisco and the Connecticut metropolitan area of New Haven, Bridgeport, Stamford, Danbury and Waterbury. The city of Naples, with a per capita income of \$36,210, ranked seventh in the nation, while the Sarasota-Bradenton area ranked 16th with \$31,792.

(Source: Census 2000 and U.S. Dept of Commerce – Bureau of Economic Analysis 1997)

EDUCATION

Florida spent \$6,383 per student compared to the national average of \$7,392 during the 1999-2000 school years. There were 18.4 students per teacher compared to a national average of 16. Attendance at private schools is comprised of 12 percent of Florida students. Out of the Floridians 25 years or older, 79.9% are high school graduates (national average 80.4%) and 22.3% have a bachelor's degree or higher.

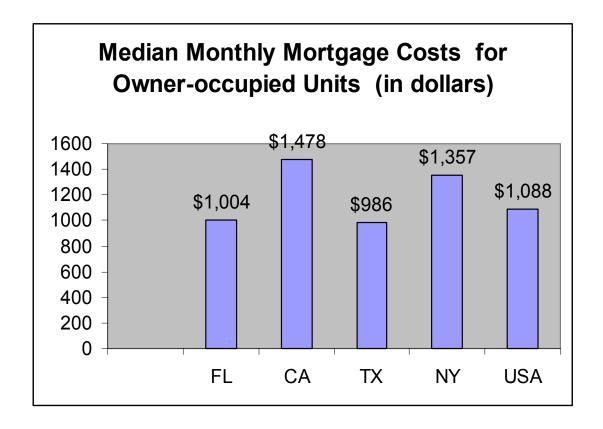

Florida had 40 public and 126 private institutions of higher learning in the 2001-2002 school year. 11 state universities and other independent colleges and universities performed over \$788 million yearly in research sponsored by business and industry. This sponsored research produced more than \$95 million in royalties to the state. Florida State University is ranked fourth in the nation in terms of royalties from academic research with \$67.5 million.

HOUSING

In 2000, the total number of housing units in the state of Florida was 7,302,947 with 6,337,929 of these units being occupied. The percentage of households that were occupied by owners (as opposed to renters) in Florida increased from 67.2 to 70.1% from 1990 to 2000. The homeownership rate across the nation in 2000 was 67.5%. Homeowner vacancy rate was 2.2% and rental vacancy rate was 9.3%. The median value for an owner-occupied unit was \$105,500 compared to a median value of \$119,600 for the United States. Average household size was 2.46 persons per unit. According to a report by the Florida Home Builders Association, there were 105,101 building permits pulled in the state for single-family housing units. Singe-family residential housing also accounts as the state's fourth largest revenue generating industry.

Economic Data Industry Sectors

Florida State Market Profile

INDUSTRY SECTORS

The Economic Data section in the Florida state profile provides information regarding factors that affect business expansion. Key indicators such as labor, trade, banking, and education, are listed in the profile. There is also a section on the number of small business establishments in Florida. One key factor to the state's economy is its strategic location between Latin America, Africa and the continental United States as shown in the map below.

Florida's gross state product (GSP) was \$542.8 billion in the third quarter of 2003. The GSP is the gross market value of the goods and services attributable to labor and property located in a state.

The largest contributor to Florida's economy according to the 1997 Census was the wholesale trade sector, which contributed 26.9

percent and \$187 billion of the state's gross product. The retail trade sector followed at 21.8%. A cornerstone of this commerce is the tourism industry. Tourism has increased at a rate of 5.1% annually since 1980 (The Florida State Senate – "Florida's Highway Transportaion Needs" report, Sept. 2001). An amount of people equal to three times the state's population comes to visit Florida yearly. The service industry in general caters to tourism with retail sales concentrating on selling to tourists and the real estate and finance industries creating construction developments to attract tourists to stay or spend part of the year in Florida. Entertainment and international business related activities have also contributed to Florida's economy, perhaps in part due to the globalization. Movie production, international banking, and establishing headquarters for international business have placed Florida under a spotlight around the world. Business relating to the aerospace/defense industry is also another significant economic stimulant for the state with major military bases in Jacksonville, Key West, Tampa, Cocoa Beach and Pensacola and the Kennedy Space Center in Cape Canaveral.

The following page lists the number of businesses with and without paid employees and their sales volumes by industry sector.

Florida State Market Profile

LABOR

Florida had a work force of 7,121,770 people in 2002. The largest share, 20 percent, was employed in the office and administrative support occupation. Another 12 percent were employed in wholesale or retail sales; 8 percent in food preparation and serving; 7 percent in transportation of goods and cargo; 6 percent in production; 5 percent in construction. Just 0.5 percent held jobs in the farming, fishing, and forestry occupations category. According to the 2000 Census, Florida's unemployment rate was 3.2% compared to the nation's unemployment rate of 3.7%. In 2002, approximately 6 percent of Florida's workers were unionized. Florida is one of only eight states with a right-to-work law, which essentially prohibits union membership as a condition of employment.

Economic Data Small Businesses

Florida State Market Profile

SMALL BUSINESSES

The number of businesses in Florida with employees increased 5.3% in 2002 to a total of 413,476. Out of these, 98.8% were small businesses (with fewer than 500 employees) and the number of self-employed individuals rose by 0.6%. Small businesses employed 45.6% of the states total non-farm workers. Women made up 38% of self-employed workers, and women-owned businesses totaled 337,800. Minority-owned businesses consisted of 22%. New business firms showed an increase of 20.5% between 2001 and 2002. Business bankruptcies decreased in 2002 by 4.9% and business terminations also decreased by 4.3% in the same period. The health care and social assistance sector employed the largest share of small business workers in 2000. Total small business income in Florida, derived in part from non-farm proprietor's income, for 2002 increased 5.8% to \$31 billion. (Source: U.S. Small Business Administration, Office of Advocacy)

Florida has built a strong infrastructure system to meet current and future demands for electricity, gas and water, telecommunications capacity and other core needs to support businesses. A network access point (NAP) is planned in Jacksonville to provide better communication links between Florida and Europe. The \$120 million Jacksonville International Technology Center, a massive fiber optic-linked Internet switchboard within a 160,000-square-foot facility, is slated to go live in 2004. The seventh NAP in the U.S., it would complement two existing NAPs in South Florida.

Nonprofit Tampa Bay Water, a tri-county water wholesaler, in early 2003 began operating the largest seawater desalination facility ever built in the United States. One goal is to convert seawater efficiently enough to sell it for about \$2 per 1,000 gallons, half the typical groundwater costs.

Florida Power and Light (FPL), the largest developer and operator of wind-power generation in the nation and the fastest growing electric utility in the United States, serves nearly half the state of Florida. FPL Group is adding a 1,107-megawatt unit in Manatee County as part of a \$1.1 billion project that also includes adding a 789-megawatt unit in Martin County.

The state of Florida offers incentives to stimulate job and business growth. Such incentives include tax credits for job creation, funding of roadways for better transportation, workforce training, and grants for high-impact industries such as biomedicine and aerospace. Certain geographic areas with greater needs have also had an Enterprise Zone program to stimulate economic revitalization. This program offers additional incentives to businesses located within specific zone boundaries to increase jobs and investments.

Why start a business in Florida?

STRONG INCENTIVES

Qualified Target Industry Tax Refund (QTI)

Provides up to \$3,000 per new job created in targeted sectors or up to \$6,000 in Enterprise Zones or rural areas, with additional bonuses for extremely high wages.

Economic Development Transportation Fund

Up to \$2 million per project is available to ease transportation woes that adversely impact a company's location or expansion decision.

High Impact Performance Incentive (HIPI)

A negotiated grant used to attract and grow major facilities in designated high-impact industry segments.

Capital Investment Tax Credit (CITC)

An annual credit against Florida corporate income tax for projects in designated high-impact industries that make capital investments of at least\$25 million and create at least 100 jobs.

Economic Data Small Businesses

Florida State Market Profile

Defense/Homeland Security Industry Incentives

Among incentives are tax refunds to help Florida companies compete for new contracts, sales tax exemptions, grants to aid communities where bases are designated for closure and grants to help communities upgrade military-related infrastructure.

Quick Response Training (QRT)

Offers customized training to secure new value-added businesses to Florida and provide existing businesses with necessary training to enable expansion.

Enterprise Bond Program

Provides tax-exempt, low-interest bond financing (\$200,000-\$500,000) to manufacturing firms and nonprofits.

TAX ADVANTAGES

- NO state personal income tax
- NO corporate franchise tax levied on capital stock
- NO state-level ad valorem taxes
- NO tax on goods-in-transit
- Sales and use tax exemption on electricity used in manufacturing
- Sales and use tax exemption on manufacturing machinery and equipment for new and expanding businesses

BANKING/INVESTMENTS

The SBA aids and protects the interests of Florida's commercial banks. The Agency accomplishes this by working with lending institutions to promote loans and venture capital financing to small businesses. The loans are commonly used by businesses for office/warehouse space, additional inventory, operating expenses, and equipment. In 2002, there were 259 banks operating in Florida, and the largest group of banks by asset size was in the \$100 million to \$500 million category. Small businesses are encouraged to visit lenders that participate in SBA's certified (CLP) or preferred loan programs (PLP) for expedited handling and desirable terms of the loan package.

For the lending community, banking is an "international affair" in Florida. Many countries establish bank branch offices in the state due to its strategic location with many European and Latin American countries. International banks in the state (foreign banks, Edge Act corporations, and US-insured institutions) are vehicles for international trade by providing letters of credit, currency exchange, trade related loans, and financing projects in various countries throughout the Americas. (Source: Enterprise Florida Inc., "Financial Advantages" webpage)

Foreign direct investment, although it does not directly affect Florida's banking size, influences banking through property acquisitions and job creations in the state. Foreign direct investment in the state of Florida is valued at \$35.8 billion, ranking the state 7th in the nation for total holdings by non-US companies. When foreign companies come to Florida they need to build or purchase office/warehouse space which may require use of local bank loans. They may also inject capital (such as venture capital or company shares) into other Florida businesses. Once the foreign companies open their doors they also create local jobs. These workers contribute to Florida's economy and the banking community by paying and/or borrowing for housing, automobiles, taxes, and other consumer goods. For 2000, Florida's top foreign direct investors were France, Canada, United Kingdom, Netherlands, Japan, and Germany by ranking order. (Source: Enterprise Florida Inc., Foreign Direct Investment report 2002)

Economic Data Trade/Cargo

Florida State Market Profile

TRADE/CARGO

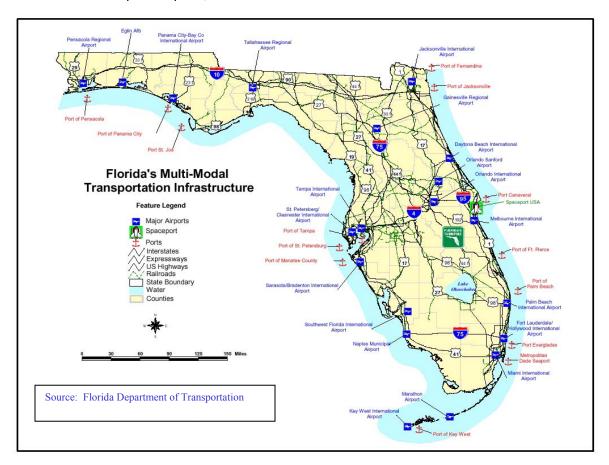

Florida is located in the southeastern most tip of the continental US making it the transportation gateway to Africa and many southern parts of the western hemisphere. Miami's International Airport is ranked 3rd in the nation for international passenger traffic (Source: Miami-Dade County Airport Authority). Florida also accounts for 6% of the nation's annual air cargo tonnage. Total merchandise trade for the state in 2002 reached \$70.1

billion and exports to all countries totaled \$32.2 billion. The state's largest exporter was Brazil accounting for \$5.2 billion in exports. The Dominican Republic was the second largest export destination at \$2.4 billion followed by

Commodity	Millions of Dollars	% Share
Total for All Industries	\$24,544.20	100.0%
Computer and Electronic Products	\$7,226.10	29.4%
Transportation Equipment	\$3,638.50	14.8%
Chemicals	\$2,673.20	10.9%
Machinery, Except Electrical	\$2,354.20	9.6%
Miscellaneous Manufactured Commodities	\$1,272,20	5.2%

Top Florida-Origin Export Commodities 200-2002

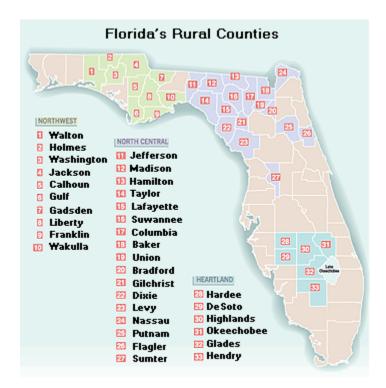

Venezuela at \$2.1 billion. Florida's leading import countries were Japan (\$4.8 billion), Brazil (\$4.3 billion), Dominican Republic (\$2.4 billion), and Germany (\$2.3 billion). (Source: Enterprise Florida Inc.'s, Florida Merchandise Trade Report 2002) From 1990 to 1999, Florida's waterborne and airborne cargo movements increased by 129%. The state's fourteen public deep water ports experienced a 16% increase in tonnage reaching more than 139 million tons. Transporting containers from these seaports increased from fewer than 1 million units (20 foot container) in 1990 to over 2.5 million units by 1999. (Source: The Florida State Senate – "Florida's Highway Transportation Needs" report, Sept. 2001) Any place in Florida is located about 100 miles from one or more of the 14 deep water ports, as shown below.

RURAL AREA DEMOGRAPHICS

Florida ranks 23rd in the nation for total land area with 53,938 square miles of land. Some of the major cities or metropolitan areas in Florida include Jacksonville, the most populated in the state with 735,617 inhabitants. The largest industries in the city are insurance and finance. Jacksonville also has an important seaport. The Tampa Bay metropolitan area is located on the Gulf Coast with 2.4 million people and contains the cities of Tampa, Clearwater, and Saint Petersburg. Tampa Bay is the western end of the Florida "high tech corridor" which houses more than 50 percent of the states high tech companies. Orlando is a city located in the center of the state and has a population of 185,951 that serves a metropolitan area of more than 1.5 million people. Orlando's major industries include citrus fruit, aerospace, and tourism where almost 50% of the state's tourists come to visit. The "Gold Coast Megalopolis" is a continuous corridor of cities and suburbs beginning in the southern part of Miami-Dade County (Homestead city) continuing north through Fort Lauderdale (Broward County) and into the northern reaches of Palm Beach County. Almost 4 million of Florida's 16 million people live here. Key West, Florida's southernmost city, and Pensacola, located on the panhandle, both have U.S. naval

facilities. Saint Augustine is the nation's oldest inhabited city.

The more rural areas of Florida, approximately 33 of the state's 65 counties, offer small businesses competitively priced land, lower labor costs, a skilled workforce and ease of shipping. There is no Florida town that is located more than an approximate 2 hour drive to a seaport or airport. For small businesses that have a choice on where to locate, there are real incentives and advantages for choosing to establish themselves in a rural or other special designated area instead of a metropolitan area. Florida's rural counties, designated by the U.S. Office of Management and Budget in 1993, are shown on the map to the left. The U.S. Dept. of Agriculture (Economic Research

Service), further classified these counties into one of six non-overlapping economic types:

Farming-dependent
Mining-dependent
Manufacturing-dependent
Government-dependent
Services-dependent
Nonspecialized.
(See definitions in Appendix)

The SBA also recognizes these special geographic areas and places emphasis on small business concerns located in urban or rural areas with high proportions of unemployed or low-income individuals and other groups with limited capital due to limited opportunities for small business ownership. These

identified "special" geographic areas are considered because SBA wishes to significantly increase the success of small businesses within parts of society confronting competitive opportunity gaps. SBA's strategy includes special focus programs intended to streamline programs via client-centric technology, such as Internet-based communications. Other sectors of the population that these special focus programs include are ethnic populations, women, veterans, and place-based (HUBZone, Low or Moderate Income Areas, Enterprise Communities/Empowerment Zones). Similar to SBA's placed-based strategy, the state of Florida also establishes its own Rural or Urban Enterprise Zones which are specific geographic areas targeted for economic revitalizing by offering tax advantages and incentives to businesses locating within the zone boundaries.

(Sources: California State University, Fullerton – Online Geography Library. U.S. Small Business Administration – Strategic Plan and YES Intranet. Enterprise Florida Inc – Enterprise Zones website.)

SMALL BUSINESSES in SPECIAL AREAS

For historically challenged areas the federal, state, local government agencies have joined efforts to revitalize these areas through economic development and training. At the Federal level there is the Community Empowerment Program, established by the Omnibus Budget Reconciliation Act of 1993 (OBRA 1993). OBRA 1993 authorized the U.S. Department of Health and Human Services (HHS) to grant funds to states for the Empowerment Zones (EZ) and Enterprise Communities (EC), and the U.S. Departments of Agriculture (USDA) and Housing and Urban Development (HUD) to designate the EZs and ECs. Initially, the USDA administered the rural portion of the program and HUD administered the urban portion. HUD later became involved with rural areas as well through a third program they created called Renewal Communities (RC).

These areas are defined by census tracts and may contain a maximum of 30,000 people and 1,000 square miles. There must also be a notable sign of poverty, unemployment, and overall distress throughout the area. Most of these areas also fall into the category of "rural". However, not all rural areas automatically qualify as applicants for an empowerment program.

There are two federally designated enterprise communities and no federal empowerment zones in Florida. The ECs in Florida are Jackson County EC and the Empowerment Alliance of Southwest Florida EC. The remaining rural communities that completed the planning process for EZ or EC designation but were not accepted were still recognized by the USDA under the "Champion Communities" program. Eight communities in the state of Florida are designated Champion Communities and receive project specific funding. The principle components of the empowerment program are job creation, economic development, creating community partnerships, and development of a strategy for change. The program was divided into "Rounds" that provided different levels of funding to the different program types (EZ or EC). The table below lists the specifications about each round.

In conjunction with Federal government agencies, the state of Florida has a similar community empowerment program for those areas of the state facing challenges with the sustainability of their community and economic development. There are 51 state **Enterprise Zones** (EZ), 25 Urban Enterprise Zones and 26 Rural Enterprise Zones, in Florida. Florida's State Legislature passed the Florida Enterprise Zone act of 1994 which is mostly based on the federal government's **Empowerment** Program.

United States Rural Empowerment Program

(U.S. Dept. of Agriculture and U.S. Dept. of Housing and Urban Development)

Round	Empowerment Program	Effective Date	Funds
1 *	EZ	August 10, 1993	\$40 Million per EZ
_		3333 3, 333	\$40 Million per EZ
	EC	August 10, 1993	\$2.97 million per EC
2 **			
	EZ	December 24, 1998	\$2 Million per EZ
-	EC	December 24, 1998	\$250,000 per EC
3			
ŭ	EZ	January 1, 2002	\$100,000 initially per EZ
-	EC	January 1, 2002	
* (10 year grant fu	unded from Health and Hu	ıman Services Title 20. Social	Service Block Grant)

^{** (8} year grant funded from U.S. Dept. of Agriculture's FY2000 budget)

The state uses their EZ programs to offer incentives and tax advantages for new businesses moving into one of these zones. Available Enterprise Zone incentives include: job tax credits for employing zone residents, sales tax refunds on business equipment, sales tax refunds on building materials, Enterprise Zone property tax credit and sales tax exemptions on electrical energy.

Plentiful incentives for Florida businesses in rural/special areas

Qualified Target Industry Tax Refunds. QTI tax refunds are enhanced for rural locations. The cash tax refund program, over a minimum of four years, pays at least \$4,800 per job created for eligible companies involved.

- **Economic Development Transportation Fund.** Known as the Road Fund, the EDTF also is enhanced for rural locations. Grants go to local governments on behalf of business, with the monies used for road improvements up to \$2 million per project.
- **Rural Job Tax Credit.** A tax credit may be taken by eligible businesses for the creation of a new job (against sales and use or corporate income tax) at \$1,000 for each job created.
- Quick Response Training. QRT grant funding is available to reimburse companies for customized training costs for new employees.
- Incumbent Worker Training. Grant funding is available for reimbursement of training costs for existing employees.
- Rural Infrastructure Fund. Grants made to local government on behalf of a business for public infrastructure upgrades may fund up to 30 percent of those costs.
- Community Development Revolving Loan Program. Loan or loan guaranty for a specific
 project that will lead to new jobs and increase the economic vitality and diversification of Florida's
 rural counties.

Targeted assistance

Also important are incentives available in Rural Enterprise Zones (REZ) located in most of the 33 Crossroads counties (www.floridaenterprisezones.com):

- REZ Jobs Tax Credit. A tax credit for up to 24 months is allowed against corporate income tax or sales and use tax for new jobs created. The credit is for 30 percent of wages paid to employees living in a Rural Enterprise Zone. The credit increases up to 45 percent if more than 20 percent of employees live there.
- **REZ Property Tax Credit.** A tax credit is allowed on corporate income tax equal to 96 percent of ad valorem taxes paid on the new or improved property, for up to \$25,000 per year for five years; the cap is \$50,000 per year if 20 percent of the employees live within the REZ.
- **REZ Business Equipment Sales Tax Refund.** This is a refund of sales taxes paid on business property with a sales price of at least \$5,000 per unit; the property must be used exclusively in the REZ for at least three years.
- **REZ Building Materials Sales Tax Refund.** This is a refund of sales taxes paid on the purchase of building materials used to rehabilitate real property. Up to \$5,000 is refundable (or \$10,000 if 20 percent of the employees live within the REZ) per parcel of real estate.

STATE ENTERPRISE ZONES (Source: Enterprise Florida Inc.)

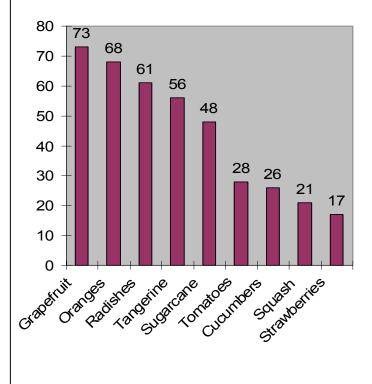

AGRICULTURE

In 2002 there were 44,000 farms in Florida. Just 66 percent of them had annual sales of more than \$10,000. Many of the rest were part-time operations for people who held other jobs. Farmland occupied 4.1 million hectares (10.2 million acres). Of that land 34 percent was planted in crops, and the rest was mostly pasture. Some 44 percent of the cropland was irrigated.

The sale of crops accounted for 77 percent of Florida's farm income in 2001. The sale of livestock and livestock products accounted for the remaining 23 percent. The principal crops are oranges and other citrus fruit, greenhouse and nursery products, tomatoes and other vegetables, and sugarcane. Livestock raised in Florida include beef and dairy cattle, chickens for eggs and meat, hogs, and Thoroughbred horses.

Agriculture Sales as a Percent of the Nation's Cash Receipts

A1 Patterns of Farming

In the Florida panhandle, where commercial agriculture is not a major activity, livestock, cotton, peanuts, and other crops are raised on a relatively small scale. Farther east and southeast, in the northern part of the peninsula, agriculture is more important. In this area the chief crops are tobacco, peanuts, cotton, and vegetables. Dairy cattle and chickens are also raised. In central Florida, the leading crops are oranges and other citrus fruits. However, this area is also noted for its vegetable farms, ornamental horticulture, cattle ranches, and horse farms. In south central and southern Florida, the principal crops are vegetables and sugarcane. Cattle are also raised.

A2 Citrus Fruit

Florida leads all other states in the production of citrus fruits. Each year the state accounts for two-thirds of the total U.S. citrus crop. It ranks first in the nation in the production of oranges and grapefruit. Other kinds of citrus fruits grown include tangerines, tangelos, and limes. The fruits are grown in groves that generally cover less than 8 hectares.

The preferred land for growing citrus fruit is the rolling lake district of the central Florida peninsula, where the numerous bodies of water retain their warmth in cold weather and help reduce frost hazards. The gently sloping terrain causes cold air to sink into hollows below the level of the fruit. Most citrus in Florida is

Percent of 1997 employment in farm and farm-related jobs

	Rural	Metro	State
Total	22.9	14.1	14.6
Production	6	0.9	1.2
Farm inputs	0.5	0.2	0.2
Processing &			
marketing	1.6	0.9	1
Wholesale & retail			
trade	12.6	11.5	11.5

grown without irrigation, but sprinkler systems are used to irrigate the groves during especially dry years. These systems also supply water for spraying the fruit during brief episodes of below-freezing, nighttime temperatures. The water freezes on the citrus fruit and insulates the fruit's interior.

A3 Sugar

Sugarcane is extremely sensitive to frost, and where frosts occur, it must be replanted every year. The southernmost part of Florida is one of the few places in the mainland United States where such replanting is not necessary. Six to seven crops may be obtained from one planting. The city of Clewiston, on the southern shore of Lake Okeechobee, is the center of Florida's sugarcane cultivation. Production was expanded after 1961, when the United States stopped importing Cuban sugar because of political differences.

A4 Vegetables and Noncitrus Fruits

Florida is noted for the production of early vegetables and fruit. The growing of vegetables and fruit for sale early in the year is a modern development that owes its advance in part to the demand for fresh vegetables in states north of Florida. Florida's warm near-tropical climate allows its farmers to produce crops earlier than farmers in most other states and thus to obtain good prices in cities north of Florida. Tomatoes are the most valuable winter crop, and potatoes, sweet corn, celery, carrots, and lettuce are also grown.

Watermelons are a valuable summer crop in Florida and, like early vegetables, they are shipped mainly to Northern cities. Strawberries are another important crop. The Plant City area, east of Tampa Bay, is the center for strawberry cultivation. Together with Sanford, it is also a leading celery-producing center. Cucumbers are grown mainly in northern Florida, and early white potatoes are a specialty of the Hastings area. Among the other kinds of fruit grown in Florida are avocados, figs, persimmons, guavas, mangoes, pineapples, peaches, and grapes.

Florida is one of the major cattle-raising states east of the Mississippi River. The rolling grassland in central Florida is the heart of the beef cattle country. Rodeos, ranches, and cowboys there provide an atmosphere more characteristic of the West than of the Atlantic Coast. Dairying meets the demand for fresh milk and other dairy products within the state. Thoroughbred horses are also raised in large numbers. Most of the stud farms are in the Ocala area of north central Florida. Poultry raising is an important, growing segment of the state's livestock industry. Some hogs and sheep are also raised in Florida.

More than 44,000 Florida commercial farmers are among the most productive in the world, furnishing the nation with a dependable and safe supply of food and providing Florida with a stable economic base.

Florida is the nation's No. 9 ranked agriculture state with total cash receipts of over \$6.9 billion in 2000.

Florida is the nation's No. 1 citrus and sugarcane producing state, No. 2 in greenhouse and nursery production as well as tomato and strawberry production, and ranks No. 4 in aquaculture and honey production.

State farmers led the nation in the production of 8 major agricultural commodities in 2000, including oranges, sugarcane, grapefruit, cucumbers, fresh snap beans, sweet corn, tangerines and radishes.

Florida accounted for more than 73 percent of the total U.S. cash receipts for grapefruit, 68 percent for oranges, 61 percent of radishes, 56 percent of tangerines, 48 percent of the cane for sugar, 28 percent tomatoes, 26 percent for cucumbers, 21 percent for squash and 17 percent for strawberries.

Florida produced more than 20 percent of the nation's fresh vegetables with sales of \$1.7 billion. Citrus sales topped \$1.6 billion in 2000.

Florida livestock sales amounted to \$1.4 billion in 2000, accounting for nearly 20 percent of the state's farm sales.

Florida is the leading milk-producing state in the Southeast, ranks 13th nationally in cash receipts and 15th nationally in production with sales of more than \$428.8 million in 2001.

The horse industry generated product valued at \$2.2 billion with 240,000 Floridians involved in the horse industry.

The Ocala area ranks as the world's fourth largest breeding and training area, behind Lexington, Ky.; Newmarket, England, and Chantilly, France. Florida overtook California in 1998 to become the nation's second largest producer of registered Thoroughbred

Florida is the world leader in phosphate rock production, producing approximately 75 percent of the U.S. phosphate supply and about 25 percent of the world supply annually.

Of the Florida rock mined, 90 percent is used to make fertilizer for the production of food and fiber on Florida and U.S. farms.

To the State:

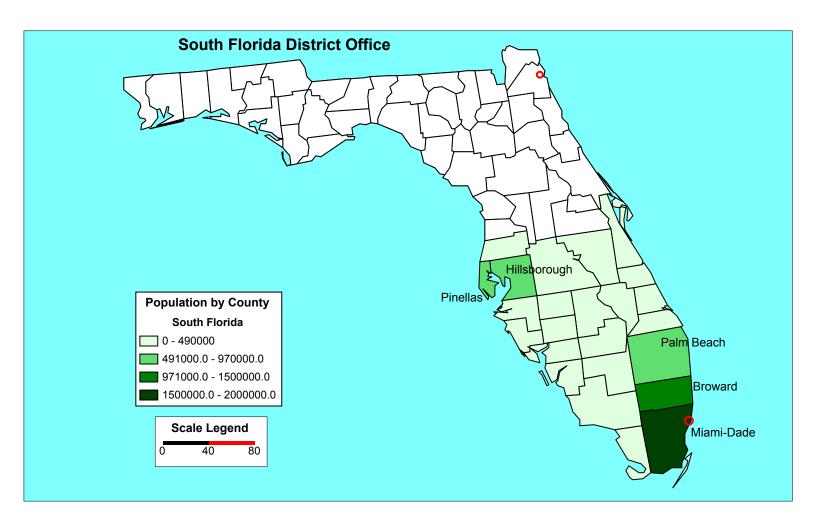

Florida farmers utilized a little more than 10 million of the state's 35 million acres to produce Florida's safe, affordable and abundant food supply.

Florida farmers employed an average of 66,000 farm workers monthly in 2000, and paid them more than \$1 billion. They accounted for a \$20 billion direct impact on the state's economy.

Florida's total citrus production reached the fourth highest on record with more than 279 million boxes harvested in 1999-2000, and increased its total value to over \$1.6 billion and its on-tree value to \$760 million.
